Mr Richard Schassburger
U S Department of Energy
Rocky Flats Office
P O Box 928
Golden, CO 80402-0928

Dear Mr Schassburger

As part of the effort to develop the scope of the Rocky Flats Comprehensive Risk Assessment (CRA), EPA developed a draft Human Health Risk Assessment Technical Memorandum intended to function as a template for the technical memoranda required by paragraphs VII D 1 a through VII D 1 c of the Interagency Agreement Statement of Work. A copy of the draft document is enclosed for your information and is currently under review by the interagency CRA forum.

It is EPA's intent to incorporate comments of the CRA forum into a final version of the document and, after concurrence of EPA, CDH, and DOE, implement this document on a sitewide basis. At that point, only the following information will need to be submitted by DOE for review and approval in order to satisfy the requirements of the above referenced portions of the Interagency Agreement:

- 1 Summary tables of the contaminants of concern for each operable unit
- 2 Deviations from the exposure scenarios and exposure pathway equation parameters along with site specific justification
- 3 Fate and transport models chosen by applying the criteria in the Technical Memorandum
- 4 Only those toxicity constants proposed for use which are not listed in the Integrated Risk Information System or the Health Effects Assessment Summary Tables

ADMIN RECORD

In order to maximize the benefits of implementing this technical memorandum, it must be finalized soon since a large effort is currently underway to prepare four separate documents for each operable unit. Therefore, we request that DOE's written comments be submitted to EPA no later than July 14, 1993. Any questions or concerns can be directed to Bonnie Lavelle at (303) 294-1067.

Sincerely,

A handwritten signature in cursive script, appearing to read "Martin Hestmark".

Martin Hestmark, Manager
Rocky Flats Project
